INTRODUCTION

Background and Methodology

Background

- Richmond Hill is a city in south-central York Region. It is York Region's third most populous municipality.
- Since 2000, Richmond Hill has conducted a community survey six times.
- Results of the 2019 Community Survey were benchmarked against community surveys conducted in 2000, 2002, 2007, 2012 and 2016. All historical results are included within this report. Due to changes in the questionnaire, some questions could not be benchmarked to previous surveys.

Methodology (1)

- The City of Richmond Hill commissioned Ipsos to conduct its 2019 Community Survey.
- The survey was conducted by telephone among n=800 respondents 18 years of age and older living in the City of Richmond Hill. The survey was conducted between March 25 and April 9, 2019.
- The margin of error for a sample of n=800 completed interviews is +/- 3.5 %, 19 times out of 20.
- The results of the survey have been weighted based on age, gender and ward to match the demographic profile of residents based on 2016 census data.
- The response rate for this survey was 12 percent, which is typical of a telephone survey with multiple quotas (age, gender and ward quotas were set for the 2019 survey). Quotas by age were set to achieve a minimum of n=100 completes among residents aged 18 to 35. Ward quotas of n=120 were also set to ensure each ward was represented within the data.
- In an effort to be as inclusive as possible, respondents were given the option to complete the survey in English, Cantonese, Farsi or Russian, as these are the top languages spoken in the City of Richmond Hill according to Statistics Canada.
- All randomly selected respondents were asked, after a brief introduction, if they were comfortable conducting the interview in English. Respondents who said they were not, were then asked if they would prefer to receive a call back to complete the survey in either Cantonese, Farsi or Russian. In the case that a respondent expressed interest to complete the survey in one of the specified languages, the interviewer would arrange a call back in the preferred language.
- A total of 34 call backs were requested in a different language (7 in Russian, 20 in Cantonese, and 7 in Farsi); 5 of which resulted in completed interviews 4 in Cantonese and 1 in Farsi.

Methodology (2)

- An effort was made to contact residents via cell phone, but almost all the cell phone numbers assigned to the Richmond Hill cell phone exchange were non-assigned numbers. Sample from other cell phone exchanges within York Region that are in close proximity to Richmond Hill was also utilized, however these phone numbers were also unassigned.
- The main reason for including cell phone sample in the study was to ensure that the survey included sufficient response from residents aged 18 to 35 (who are less likely to have a landline). In response to low performing cell phone sample, Ipsos ensured that a sufficient number of residents in this age group were reached via landline as a significant proportion of this demographic population also resides with older adults in the same household.

Reporting Conventions and Normative Comparisons (1)

REPORTING CONVENTIONS

In some questions those who were unable to provide a response (i.e., Answered "don't know" or "no opinion" were removed from the analysis. Therefore, the "n" reported for each of these questions will not always equal the total sample of 800.

Due to rounding, there are some cases where totals do not round to exactly 100%. In other cases, respondents were able to provide multiple responses to a survey question and for this reason the total percent exceeds 100%.

Please note that throughout the report, significant differences between 2016 and 2019 have been designated as follows:

- Significantly higher
- Significantly lower

Differences among subgroups are designated with pink and green shading. Green indicates that the number in that cell(s) is(are) significantly higher than the cell(s) shaded pink within a specific demographic category. In the example below, the number for men is significantly higher than the number for women.

Male	Female
22%	12%

Reporting Conventions and Normative Comparisons (2)

References to "Top 2 Box" score refer to the net of the highest 2 categories on a rating scale. For example, if the scale is: very satisfied, somewhat satisfied, somewhat dissatisfied and strongly dissatisfied, then the combined category of somewhat satisfied and strongly satisfied is referred to as the Top 2 Box Score.

Please note that as Richmond Hill became a City while the current survey was in field, the questionnaire referred to it as a Town. Within the report, Richmond Hill will be referred to as a city, except where the actual wording of a question includes the word "Town."

NORMATIVE COMPARISONS

Comparisons have been made between the results of the 2019 City of Richmond Hill Community Survey to Ipsos' database of municipal normative data where possible.

This normative database is comprised of survey findings for select questions from other municipal government from across the country.

EXECUTIVE SUMMARY

Executive Summary (1)

The results of the 2019 Community Survey for the City of Richmond Hill continue to be very positive: large majorities of residents are satisfied with Richmond Hill as a place to live, believe Richmond Hill is welcoming and vibrant, feel a strong sense of belonging to Richmond Hill, and express overall satisfaction with services. In fact, majorities of residents express satisfaction with all specific services provided by the City. Nonetheless, satisfaction in a few areas has declined, namely about the maintenance of infrastructure and the quality of roads and snow clearing, which has had an impact on perceptions of the City as a place to live.

Life in Richmond Hill

An overwhelming majority (92%) of residents are satisfied with Richmond Hill as a place to live (including half who are very satisfied), however slightly fewer residents indicate this as compared to in 2016 (down 4 points). Residents continue to find Richmond Hill's location (being close to amenities, such as shopping and other services) its greatest appeal (42%). And, although the City continues to grow, an increasing number of residents still find it appealing as a close-knit community (24%, up 6 points), and large majorities see Richmond Hill as welcoming (85%) and feel a sense of belonging (79%).

The City receives good ratings on its natural areas, with a growing number of residents who say the large number of parks and open spaces is the most appealing thing about the City (27%, up 7 points), similarly an overwhelming majority think Richmond Hill has a good network of parks, natural areas and trails (89%).

In contrast, there has been some decline in perceptions of infrastructure, with fewer agreeing that it is well-maintained (78%, down 5 points), and an increasing number of residents believe that improving the road system will be an important issue within the next 5 to 10 years (26%, up 15 points).

Executive Summary (2)

Satisfaction with Services

Almost all residents (92%) say they are satisfied (either very or somewhat) with the services offered by the City of Richmond Hill overall. Moreover, majorities of residents express satisfaction with all services, with satisfaction highest for fire protection services (98%), recreation facilities (95%), parks, open spaces and pathways (94%), and condition and maintenance of water and sewage systems (94%), and lowest for land use planning (66%) and road quality and maintenance (65%).

Since 2016, satisfaction has improved for by-law and parking enforcement (up 7 points), parks, open spaces and pathways (up 5 points), land use planning (up 5 points), and recreation facilities (up 4 points), while it has deteriorated for infrastructure-related services, such as road quality and maintenance (down 14 points) and condition and maintenance of Town sidewalks (down 6 points), as well as for snow clearing from roads and sidewalks (down 6 points), and libraries (down 3 points).

To improve satisfaction with services overall, the City must focus on service areas that are most important and have the most room for improvement. Based on the derived importance analysis, the 3 priority areas for improvement are: snow clearing from roads and sidewalks, land use planning, and road quality and maintenance.

Community Engagement and Communication

When it comes to the current opportunities offered by Richmond Hill to engage or be consulted regarding important matters, the majority of respondents (60%) continue to be satisfied with the level of engagement/consultation the City offers. Although most residents (55%) believe they receive the right amount of information, a sizeable number (44%) say they are receiving too little information. The most preferred ways for the City to communicate information are e-mail (54%), followed by mail (33%), and newsletters, pamphlets, flyers and brochures (21%).

LIFE IN RICHMOND HILL

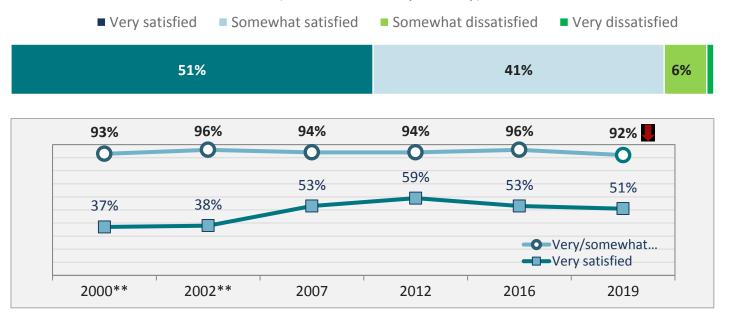

Richmond Hill As a Place to Live

• The vast majority (92%) of residents are satisfied with Richmond Hill as a place to live, including half (51%) who are very satisfied. However, satisfaction is down 4 points from 2016.

• Satisfaction with Richmond Hill as a place to live is significantly higher among those who have children under 18 in the household than those who do not (96% vs. 91%, respectively).

Most Appealing Aspects About Richmond Hill

When residents were asked what they believe to be the most appealing aspects about Richmond Hill, the most commonly mentioned responses (top-of-mind) is location/close to amenities (42%), followed by availability of parks and open spaces (27%), close-knit/high community spirit (24%), good service/amenities (24%) and safety (17%).

Most Appealing Aspects About Richmond Hill – In Their Own Words

Location proximity to services and downtown Toronto. It's a good place to live, low crime, lots of parks, lots of services.

There are two main factors. One is safety factor: it is very safe and it's very important for me. Second thing is, convenience. It's close to work, close to where I shop. Everything I need is close to where I live.

Green space. Having parks and open spaces not getting over built like some areas...Generally, just good neighborhoods and good people. The fact that it still has the small town feel to it.

Community services. The different attractions like lakes, old architecture buildings. The different recreational activities and community centres. The venues are all top notch.

Most Appealing Aspects About Richmond Hill Over Time

Location/close to amenities (42%) continues to be the most appealing aspect of Richmond Hill. More residents are mentioning lots of parks and open spaces (27%, up 7 points), close-knit/high community spirit (24%, up 6 points) and schools/education (12%, up 6 points), while fewer cite access to arts and culture (2%, down 5 points).

Q2T. What, in your opinion, would you say are the most appealing things about Richmond Hill? Base: All respondents (n=800)

There are several new mentions in 2019, the largest being good services and amenities (24%),

Most Important Issues in Richmond Hill

In this question, residents were asked what they think will be the most important issues that Richmond Hill will deal with in the next 5 or 10 years. The most commonly mentioned issues are traffic (35%), improving public transit (29%), urbanization/population growth (28%) and improving the road system (26%).

Most Important Issues Over Time

Traffic remains at the top of the list of the most important issues Richmond Hill will have to deal with in the next 5 to 10 years, but concern is down since 2016 (down 10 points).

In contrast, residents are more likely to mention improving the road system (up 15 points to the highest level since it was first mentioned in 2000), which is related to traffic and congestion.

Other issues of greater importance include improving public transit, urbanization, land use, and a lack of affordable housing, which has significantly increased by 13 points since 2016.

Perceptions Toward Community Life (% Rated 5, 6 or 7)

When asked their perceptions of various aspects of life in Richmond Hill, residents are most likely to agree that Richmond Hill has a good network of parks, natural areas and trails (89%), that Richmond Hill is a welcoming community (85%), that the diversity in Richmond Hill is one of its strengths (82%), and Richmond Hill is a vibrant community (81%). In contrast, residents continue to be least likely to agree that they feel connected to their neighbours (67%) and that their tax dollars are being used effectively (63%).

Since 2016, agreement that there are meaningful opportunities to volunteer has rebounded to the highest level ever (up 11 points), following a decline in 2016. There has been a smaller increase of 4 points in agreement that diversity is one of Richmond Hill's strengths. In contrast, agreement that infrastructure is well-maintained is down to its lowest level ever.

SATISFACTION WITH SERVICES

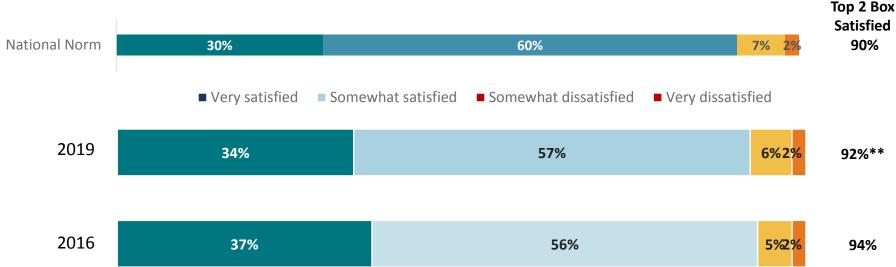

Overall Satisfaction With Services

The vast majority (92%) of residents are satisfied with the services offered by Richmond Hill, more residents mention that they are 'somewhat satisfied' (57%). These figures are not significantly different from 2016.

Overall satisfaction with services is on par with the national norm* (92% vs. 90%), but the proportion of Richmond Hill residents who are "very satisfied" is significantly higher than the national norm* (34% vs. 30%).

^{*}Comparisons have been made between the results of the 2019 City of Richmond Hill Community Survey to Ipsos' database of municipal normative data where possible.

^{**}The total of the Top 2 Box does not add to the sum of "very satisfied" and "somewhat satisfied" due to rounding.

GAP ANALYSIS

Drivers of Overall Satisfaction of Services

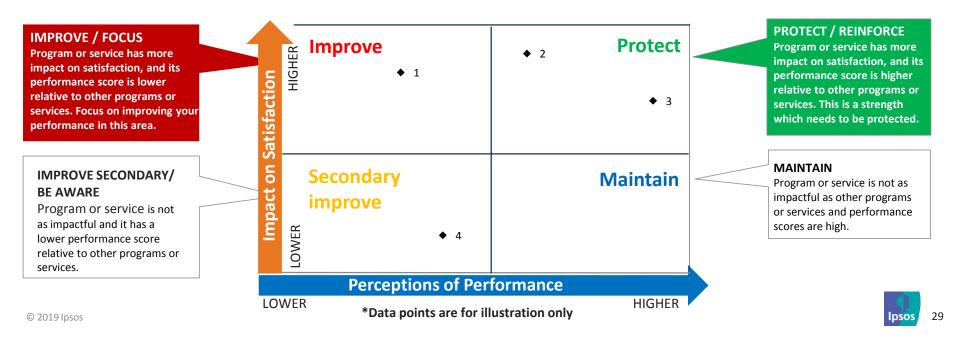

Derived importance is based on the correlation between satisfaction with individual services as determined in Q4b (p. 25), and satisfaction with services provided by the Town overall as determined in Q4a (p. 24).

The values displayed are correlation coefficients – the greater the decimal value, the more it drives overall satisfaction. Top 2 Box

UNDERSTANDING POLICY PRIORITIES (GAP ANALYSIS)

A priority matrix allows for decision makers to identify policy priorities for improvement by comparing how well residents feel the City of Richmond Hill is performing with how much impact that area has on residents' overall satisfaction (derived importance). It helps to answer the question 'what can we do to improve satisfaction'. Each driver or component will fall into one of the quadrants explained below, depending on its impact on overall satisfaction (correlation coefficient) and its performance score (provided by survey respondents).

Performance (Top 2 box % Agree)

HIGHER

RESULTS OF THE GAP ANALYSIS

AREAS FOR PROTECTION ARE:

- RECREATION AND CULTURE PROGRAMS
- ACCESS RICHMOND HILL
- ADMINISTRATIVE SERVICES
- These are areas of strength for the City of Richmond Hill, as these services are of high importance and have high satisfaction levels. The City should continue to maintain and protect these areas as they correlate highly with overall satisfaction with service delivery among residents.

PRIMARY AREAS FOR IMPROVEMENT ARE:

- SNOW CLEARING FROM ROADS AND SIDEWALKS
- LAND USE PLANNING
- ROAD QUALITY AND MAINTENANCE
- These are areas for improvement for the City of Richmond Hill, as these services are of high importance and have relatively low satisfaction levels. The City needs to prioritize these areas (as they correlate highly with overall satisfaction with service delivery among residents).

FISCAL PREFERENCES

Preferred Direction of Future Budgets

- When residents were asked to consider which of 3 guiding principles would they most prefer to be adopted when designing future budgets, views have remained relatively stable since 2007.
- A majority (56%) continue to prefer maintaining or increasing services primarily by increasing user fees for those services, while far fewer opt for reducing services to maintain or decrease property taxes (21%) or maintaining or increasing services primarily by increasing property taxes (15%).
- Those older than 75 are more likely than their younger counterparts to prefer maintaining or increasing services primarily by increasing property taxes.

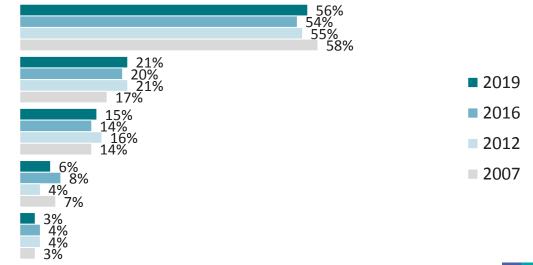

Maintain or increase services primarily by increasing user fees for those services

Reduce services to maintain or decrease property taxes

Maintain or increase services primarily by increasing property taxes

COMMUNITY ENGAGEMENT AND COMMUNICATIONS

Satisfaction with Current Opportunities to Engage or be Consulted

Residents were asked on a scale of 1 to 7 (1 being very dissatisfied, and 7 being very satisfied), how satisfied they are with the current opportunities offered by Richmond Hill to engage with or be consulted regarding important City matters. A majority of 6 in 10 (60%) continue to be satisfied with the level of engagement/consultation offered by the Town (rated 5, 6 or 7); with about 3 in 10 (27%) saying that they are very satisfied (rated 6 or 7). Satisfaction levels have remained consistent since 2012.

Satisfaction with opportunities to engage or be consulted is significantly higher among older age groups, particularly those older than 75, than among those aged 18 to 35.

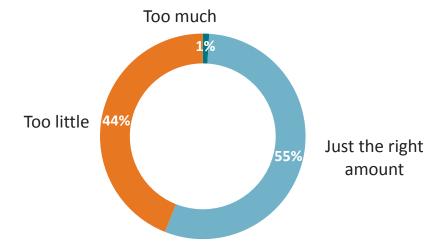

Perceived Amount of Information Received from the City of Richmond Hill

Most residents (55%) believe they are receiving just the right amount of information from the City of Richmond Hill. A sizeable proportion of 44% say they are receiving too little, while very few (1%) say they are receiving too much information.

The proportion of residents who say they are receiving too little information is on par with the National Norm (44% vs. 43%, respectively).

Residents aged 75 and under, particularly those aged 18 to 35, are significantly more likely than those older than 75 to believe they are receiving too little information, while those aged 75 and older are significantly more likely than those aged 18 to 55 to say they are receiving the right amount.

	18-35	36-55	56-75	75+
Too much	-	1%	1%	2%
Just the right amount	47%	55%	58%	70%
Too little	54%	43%	40%	27%

Preferred Methods for Communication

Email (54%), followed by mail (33%), newsletters, pamphlets, flyers and brochures (21%), newspapers (16%), the Town website (10%) and social media (8%) are seen as the best ways for the City of Richmond Hill to communicate information. Smaller proportions mention other methods.

When compared to the National Norm, preference for Email (54% vs. 27%), mail (33% vs. 23%), and newsletters/pamphlet/flyer/brochure (21% vs. 14%) is significantly higher among Richmond Hill residents, while preference for newspapers (16% vs. 23%), the Town website (10% vs. 15%), and social media (8% vs. 13%) is lower.

Preferred Methods for Communication – by Age

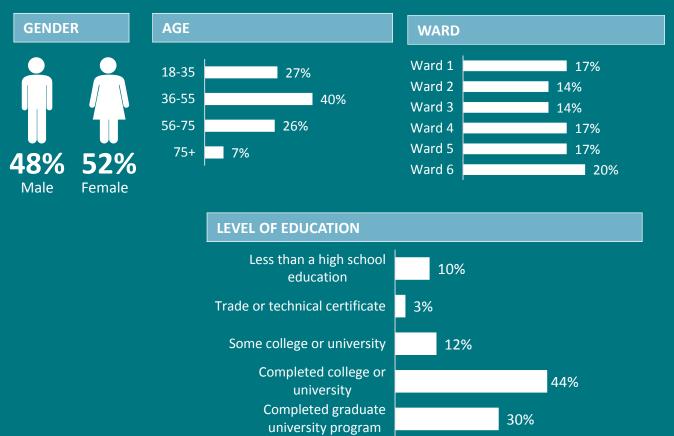

Residents aged 18 to 55 tend to prefer email and social media, while older residents are more likely to prefer newspapers. However, those aged 56 to 75 are more likely than other age groups to prefer newsletters, pamphlets, flyers and brochures and those older than 75 are more likely than the youngest age group to prefer mail. Those 75 and younger are more likely than those older than 75 to prefer the City website.

Top mentions	18-35	36-55	56-75	75+
Email	59%	63%	42%	29%
Mail	28%	35%	33%	43%
Newsletter/pamphlet/flyer/brochure	19%	18%	28%	16%
Newspaper	5%	12%	30%	29%
Town website	11%	13%	8%	1%
Social media (Twitter, Facebook, Instagram, etc.)	15%	7%	3%	-
