Hi Kaitlyn I saw the notice in the Liberal about these builders wanting to put up 4 towers of 25-29 stories @ Canyon Hill & Yonge. This is unacceptable. The original plan for this area was for nothing be over 10-15 stories- which is bad enough- so I certainly hope this is rejected. We already have a terrible traffic problem around Yonge & Elgin Mills & I doubt the VIVA bus project is likely to improve this. I work @ #7 & Leslie & the VIVA bus system does not help traffic flow & makes it very annoying for drivers trying to turn. We do not have a subway near us nor are there any major highways. Coupled with the train track crossing the whole area is a disaster for getting around.
