Subject: Proposed 4 tower complex at Yonge and Canyon Hill

Dear Ms. Graham, regarding D01-19003 and D02-19016, I wish to express my concern over this high density development. One concern is the impact on the traffic on Yonge going through the "Old Town" of Richmond Hill north of Major Mackenzie. There is a bottleneck condition there already, unrelated to construction. It is harming the desirability of local shops and diverting traffic through residential neighbourhoods. My wish would be to see development that contributes to both the attractiveness and the viability of Yonge St.

I hope that the proposed public meeting will be at a time that most residents can attend, and be well publicized.

I would like to know what the overall plan for the development of Yonge St. is.

Thank You.
