Good Morning Mayor Barrow and Members of Council,

I am not able to attend tomorrow's City Council meeting (February 26, 2020) and I would like to express my concerns for inclusion on the agenda regarding SRPRS.20.035- Request for Comments - Radio-Communication and Broadcasting Antenna System Application Public Consultation Application, which is Agenda Item 13.7. My concerns are as follows:

1. I am in opposition to the proposed telecommunication tower;
2. There was a 5 minute video shown at a former Committee of the Whole Meeting for a proposed tower location at Bayview and 16th in the timeframe of 2014-2017, and I would like that to be shown at tomorrow's meeting; and also view a Youtube video from a Women's College Hospital conference held in June 2019 – Youtube video:
<https://www.youtube.com/watch?v=RWue0YEiH58&feature=youtu.be>
3. Radiation levels are hundredfold higher in Richmond Hill compared to Toronto;
4. High levels of radiation at Buttonville Airport and radar towers;
5. Major health concerns with proposed site and tower;
6. People with electro hypersensitivity (EHS) and other chronic conditions would be further impacted;
7. Radiation at the City municipal office building and at Buttonville Airport adds too much radiation to the vicinity. This would be detrimental to all people, children and pets who are dying due to the extreme radiation.
8. The Council Meeting is not at a reasonable time (during working hours), and I would like the meeting to be moved so that I would be able to attend the meeting and present concerns with the proposed application.

I request that my personal information be omitted from public record that will be published.

Thank you,
