**Subject:** Re: Concern about the Yonge Bernard KDA Hearing scheduled on May 13rd

Hi Stephanie,

Thank you for the receipt of my concerns. I just had another concern and want to share with you and the councilors.

If the KDA plan is passed, this area would have the most population density in GTA, even in Canada, higher than the current densest KDA at Yonge/Eglinton. How could these more than 15000 new residents plus the current people keeping social distance during the next pandemic crisis? I am a clinical researcher, this is my another concern from a medical perspective, it is crucial and should be considered in the KDA plan. The COVID-19 crisis has high probability to come back year after year, some research papers have stated like that.

Please add this to the memo and get post.

Thank you!

James
