RICHMOND HILL
DATA CENTRE MURAL

Basic Information

With consideration of the nearby neighbourhood and exposed location, the mural will use large scale images aimed to appeal to the passerby in a positive manner as well as grant ample time for commuters to enjoy.

Use of bright colours will be used to capture the eye and a hyper-realism will be used to transport the viewer into another realm. The story I would like to illustrate would be one of connectivity and community. I plan to explore the symbolic natures of these topics and portray them with the upmost excellence that would do the neighbourhood proud.

I understand erecting a work of art is no small feat as it will be a permanent interaction with the community in which it lives.
