Kaitlyn,

Thank you for taking the time to discuss D01-17001 and D02-17003.

I oppose the request for increased density at this time. The current road infrastructure along Yonge and Carville/16th Ave cannot handle additional volume. The creation of the bus lanes and the increased volume at select streets to turn/uturn currently impede traffic flow.

Incremental volume will only make it worse. The existing situation is so bad, that north/south overflow volume has to be dangerously absorbed by Avenue/Person, which is filled with families, children on bikes, parks and an elementary school. Density should only be added once the infrastructure is prepared to handle it.

When this was last brought to Council, the of residents of the Ward opposed this project. I implore the Council to listen to the people they represent.

Cheers

AC
