Subject: City Files: D01-20003 & D02-20009

To all concerned,

I strongly oppose this proposed project.

This project will cause great damage to the wetlands that are situated directly behind the proposed development. The environmental damages will be significant to the wild life in the area.

Snively street , the first street south of the development, will have a significant increase in traffic, caused directly from the proposed density of this project. Snively street is not designed for this increase in traffic - the increase in traffic will pose an additional danger to the children in this neighbourhood.

The entire area surrounding the proposed project is surrounded by single family homes. An 11 storey development is inconsistent with the makeup of the neighbourhood.

I wish to be notified of any and all communication regarding this project

Thank You

Christos Babalis
