Subject: Proposed development (Part of Lot1, Plan 200)

Re: 13572 and 13586 Bayview Avenue(City Files D01-20003 and D02-20009)

Attention: Simone Fiore & City Council

I am writing in regards to the request to amend and re-zone the following properties 13572 and 13586 Bayview Avenue.

As a tax payer and resident who lives on Snively Street and within vicinity of the proposed development I am deeply concerned and I strongly oppose this development.

- The Snively reserve that backs on to the building will be significantly impacted and so will many species that the area is home to. This 11 storey building will have a huge environmental impact on the wetlands and will cause significant damage to the area and the eco system that it is being built on.
- The current massive structure being proposed does not suit the neighbourhood. It is massive in size where as the entire area is comprised of Single-Family Dwellings.
- This proposal/development is going to cause traffic, noise, pollution and destroy the current eco system.

My neighbours and I have all discussed this project and we are all united and strongly oppose this development.

We all trust and hope council will make the right decision.

Thank you,

Jin Li Fang

86 Snively Street, Richmond Hill
