**Subject:** Application for 4 high-rise buildings at Major Mac and Arnold

Hello,

Hope you have been keeping safe and healthy!

I am writing to express my deep concern about the application for 4 high-rise buildings at Major Mac and Arnold Crescent.

Fundamental resources and infrastructure in Richmond Hill are already saturated and overwhelmed! Look at the burn out at MacKenzie health... look at the traffic, look at public transit and the list goes on... from residential perspective as long as those resources are not substantially expanded, projects in this scope will consume more and more of these resources ... unless the City of Richmond Hill or York Region finds money under pillow to expand infrastructure and release more resources to the region to meet the needs of community! I feel this type of construction projects in an already dense area is only adding up to the wealth of construction companies.

It's hugely concerning to consider these application in an already matured neighborhood which is facing lack of resources.

I hope you can be my voice in considering this application and projects of this nature!

Stay safe!
