Re: Files D01-20014 and D02-20028

As residents of Richmond Hill, we strongly object to these developments. RH has become overcrowded and difficult to maneuver before this mega complex . This development will make things worse. Additionally, the look/flavor of RH has changed looking more like the Yonge/Sheppard area of Toronto- not an admirable testament.

Yonge Street is already paralyzed with traffic- though not exactly on the line of vision for this development, I am sure that the quiet residential neighbourhood which now exists is deeply saddened by this development.

RH could start to experience the same thing that is happening in TO- movement far out to smaller communities to be away from intense congestion..

Why not limit the apartment building heights to 4-5 stories instead of monstrous 19 storey buildings??
