Subject: Proposed residential development at Oneida Crescent

Hi Godwin,

I strongly against the proposed development of 4 new high-rise buildings at Oneida Crescent. There are already 6 high-rise buildings at this small community. The traffic is already bad due to the parking of the construction vehicles along the road for the construction of 4 approved high-rise building. If the proposal is approved, then there will be a total 14 high-rise buildings in this small area. This will cause big traffic problem and insufficient community facility and school problem etc. I suggest the developer should stick to its original plan to build low-rise townhouse to create a more harmonized community.

Thank you.
