Subject: City Files: D01-19005 and D02-19023

To whom it may concern,

I've received a letter regarding the above city files along with the proposed amendment.

I hereby submit my formal notice in **opposition** to the proposed official plan amendment and zoning by-law amendment.

Approval of this amendment severely reduce the quality of life for all nearby residents. Allowing the construction of four, 25-37 storeys buildings substantially block and reduce the amount of sunlight allowed to penetrate into the units. An additional 1500+ units within this crescent which is already saturated will no doubt impact the crescent's traffic flow heavily.

I hope the city council take these valid points into consideration.

I would like to be notified of the decision made by the city council.

Thanks,

Ron
