Subject: Oppose the 11160 Yonge Street development application – April 7 Council Meeting

To whom it may concern,

I think 11172 Yonge st traffic is already packed, high density development may even make it worse. 35 story tall building will affect the privacy of nearby residents. Current schools, park, community centre can't accommodate the high density development in the area. Richmond Hill has an employment crisis and shouldn't convert scarce commercial land into residential development.
