Subject: Development at 9301,9325,9335 Yonge Street

Dear Clerks, Councillar Chan and Mayor Barrow

I opposed such tall high rises for the intersection of 16th and Yonge, especially given there are plans for high rises at all corners of that intersection. I realize the plan is for the subway to extend to that location

Concerns include:

1. Noise
2. Traffic and pollution.
3. wind tunnel effects caused by the tall towers.
4. Loss of sunlight and view for the surrounding residential areas, including the already limited Observatory grounds.

I think a compromise would be lower rise buildings.

I think the City needs to reach out to the community to discuss this further as can't see the small development signs present there.

I plan to attend tonight's meeting.

Yours truly,

Elaine Woo

116 Pathlane Road, Richmond Hill, ON
