Subject: D01-20015 and D02-20029

Hello There,

I have received a notice in regards with propose D01-20015 and D02-20029

As a homeowner living very close to this plaza, I am against granting permission to this proposal.

This area is already very congested with high traffic, not many green spaces and parks, few tall buildings are already built at the intersections around this location, the infrastructure won't handle these high density buildings.

This plaza is a source of community, many residents walk to this plaza to shop for groceries, banking, etc. if this facility is removed, more cars will be on the road, as the residents need to go further to get their weekly/daily items.

The residents in this area have already lived construction from YRT bus lane for more than 3 years, they cannot possibly tolerate more constructions for another few years.

Please update me about the meeting and any new information.

I request the city remove my personal information before make my comment public on City of Richmond Hill website,

Regards,
