To the City of Richmond Hill Clerks Office:

I am writing you regarding city files D01-20016 and D02-20030 regarding the two buildings proposed at 45 Observatory Ln.

First off, I would like to express the troubling aspect of a numbered corporation (2721854 Ontario Inc) attempting to amend the official plan and zoning by laws in our neighbourhood. There is no information on the owners of this company, nor any financial record. This is quite disconcerting. Who is behind this corporation?

Secondly, I would also like to submit this written comment that I, and many other residents are against this project. A building has already gone up at the intersection of Yonge St. and Observatory Ln., and the building has had a negative impact on both traffic and noise level. — Regarding traffic, many of our stop signs have become “suggestions” rather than laws.

Please add me to any in-person town halls and extend any invite to hear further comments on this. Of course, I understand that the COVID pandemic may prevent this, but another residential building that will make the neighbourhood more crowded, louder, and less dense during a global pandemic can surely ensure all comments are heard.

Yours most Cordially
Bruce C.
