Subject: Re: City files - D02-20017, D03 14008 D03-16002

I am Sridhar Methuku, residing at 257 Harris Ave, Richmond Hill.

This is in regards to City Files: D02-20017, D03-14008 and D03-16002. Please include this as correspondence for the June 23 2021 Council meeting and include me as speaker also.

I explained the history multiple times in my previous delegations to council and I am not going in to details now but want to remind the part of history i.e Harris Beech Infill - MESP which enabled this applications brought forward by countrywide today - I have mentioned multiple time how I have been misled by City and the developer (Heathwood) responsible for the MESP , being misled about the feature on my property being lifted as result of MESP , I have made decisions based on misinformation that was provided to me, this misinformation subjected me and my family to severe stress which continues to our impact enjoyment/quality .

I understand current applicant is not responsible for the MESP but unfortunately is carrying the baggage of the history of their predecessor who assembled these lands, I firmly believe MESP also missed to include erosion caused on my neighbors and my property on southside of Harris due to storm water drainage as result of filling of pond on north of Harris and multiple other fillings around me including filling in natural linkage section to south of me in natural linkage section which slopes towards back of my property.

I want to thank Mr.Terziewski, Mr.Walters and the applicant for agreeing to redirect the storm water outlet to the east end of Harris. Based on my discussion I understand we have agreement from all parties including TRCA to redirect the storm water outlet .

I also want to thank the applicant for agreeing to share information/expertise to possible extent to help me deal with the features that are being shown on my property.

Consider the history of misinformation and land fills all around me -- I am requesting Council to request staff to work with TRCA to fully lift the feature and grandfather in prior 2007 TRCA rules and consider prior walk of my property as I continue to work with staff and hiring a consultant to move forward.

Thanks,
Sridhar Methuku
