Subject: Comment on SRPI.21.087

I would like to submit the following comment on agenda item SRPI.21.087.

"I have significant concerns about this application to amend the height of one of the buildings from 10 to 14 levels. The proposal was previously approved as such, and the sudden application for an amendment feels like a bait and switch. Without any particular reasoning (aside from selling some additional units) to increase the number of levels, I would ask that Council reject such an amendment as the population / density increase from this development is already quite significant."

Best regards,

Alex Yeung
