Subject: Re: About the plan 65M-4668 - D01-21008 and D02-21016

Hi Officer,

My families are strongly against the plan 65M-4668. The initial plan of Richlands community was a medium-sized density. The distances between these new houses which have been built are very close compared with old communities and some new communities. Around our community there still have lots of townhouses will be built. If the two apartment buildings built, they would greatly improve the density of the community. The infrastructure will become unbalance with the community. Traffic will become a big problem. Also, in the large area nearby our community there are houses and townhouses, why will the 33-story and 27-story buildings be built? It's so strange, disharmony and terrible. Finally, we don't recommend building a condo at this location, but it must be lower than a ten-story building. We hope you can accept our suggestion and resolve the problem.

Sincerely,

Sandy Huang(17 Gerden Dr.Richmond Hill)
