Respected Sir/Madam,

I am writing this email to oppose the proposal of building high-rise/high density apartments in the middle of the low-rises with the proposed dwelling units and parking spaces.

Following are the concerns/issues, which I would like to point out:

- Will cause major congestion (Leslie/Elgin mills), being in the secondary school area.
- Safety of the neighborhood will be compromised.
- High-rises/high density apartments, according to public utility/waste data, use almost twice as much energy per square metre as low/mid-rise structures. This will definitely affect the area's utility/waste issues.
- We bought this property with a primer cost, thinking that this particular area will be used for local business. As we are coming out of the pandemic slowly, I want the city to consider this area to be used for office complexes/local business, thereby helping the local economic recovery.

I would like to reiterate again, this plan/proposal will affect the social and economic structure of this area, which will in turn impact the health and safety.

Feel free to contact me if you have any questions or concerns.

Thanks & Regards,

Karthik, Kavitha
