Subject: Re: D01-21008, D02-21016 public meeting registration (0 John Birchall)

Hi Karyn,

Hope you are doing well. In connection to my letter of objection to the 0 John Birchall project dated Oct 9, I'd like to add an additional comment after receiving the high rise application study from the City.

I realized that my house will be within 400m radius of the project, hence will be impacted by the reduced sun exposure. Not only this will impact our standard of home living but that will definitively impact our potential home value.

Please note that this new proposal of 30-stories buildings development is much bigger in scope than the original plan of building up to 10- stories buildings. In addition to the concerns about traffic, safety, and amenities support that I have highlighted in my previous email, there is also reduced sun exposure that we are not expected. Myself and all residents in Richlands are definitely not prepared to accommodate an expanding community.

Sincerely,

Sharon Hou
