Subject: Oppose the density of development in 407 corridor

I would like to register my opposing vote on the high density towers in the Richmond hill Centre. Even on the picture this monstrosity development looks out of place. God forbid I still live in the area by the time this plan comes to life.

I absolutely demand the province not do this through some shady back channel but takes into account opinions of the local residents.

Keep the density to the minimum and stores maximum to 25 storeys per building. Anything higher changes Richmond hill.

Thank you
