Subject: D01-02017 and D02-20032 (10 storys)

Dear Sir/Madam,

As residents of the Richmond Hill community, we strongly oppose the proposal to construct a 10-storey high-density residential building at 11 Harries Avenue.

Public facilities in our area are already insufficient. Our community's roads, schools, and recreational spaces are reaching their limits. Adding further population density under these circumstances would place additional strain on existing infrastructure and significantly impact the quality of life and living environment for current residents.

We sincerely urge the relevant authorities to fully consider the concerns of the residents and the carrying capacity of the community. Please make a prudent decision to avoid negatively affecting the sustainable development of our neighborhood.

Sincerely,
Residents of Richmond Hill
